

## Case Study. Vianet

The logo for brightsolid, featuring the word "brightsolid" in a bold, lowercase sans-serif font, with "online innovation" in a smaller, lowercase sans-serif font underneath. The logo is set against a dark red, rounded square background.

**Vianet provides connectivity services to local, national and global companies, helping them unlock the data held across widely distributed facilities and enabling them to provide new services to their customers in ways that are more creative, direct, immediate, profitable and dynamic.**

### VENDING AND CASHLESS SERVICES

For the past 7 years, Vianet has provided an end-to-end telemetry system which includes the hardware required to extract audit data from vending machines and transmit it via GPRS to the Vianet host, and the application software which customers use to run their vending business. A new cashless system is available for the catering industry.

### M2M SERVICES

Vianet provides a range of connectivity services designed specifically for wide area M2M applications. With more than seven years experience in connecting remote equipment, Vianet delivers the optimum in simple to use, two-way connectivity throughout Europe including fixed addresses, secure connection, multiple GPRS and 3G network coverage and customised tariffs.

### TRANSACTION SERVICES

Vianet provides a range of wireless transaction services designed to release Chip & PIN card transactions from the store and enable payment transactions everywhere there is GPRS/3G coverage.

### THE SOLUTION

Vianet required brightsolid to provide a secure, always on, fully managed infrastructure to host their client services to be delivered over multiple network providers.

The brightsolid solution incorporated networking design, Infrastructure deployment and Support delivered over multiple load balanced front end web servers and Oracle 10g database servers.

### MIKE MCHALE

Account Manager, brightsolid

“Vianet required the services of an organisation that could provide not only their high end hosting requirements but also of one who could work with and deliver complicated networking solutions, crucial for the delivery of their client services. brightsolid collaborated with their technical teams and delivered their infrastructure requirements on time and within budget.”
